Das für das MA maßgebende →Weltbild war dasjenige, das →Ptolemaios im →»Almagest« und in den »Hypothesen der Planeten« erklärt hat. Die kugelförmige Erde ruht in der Mitte. Um diese lagern sich die Planetensphären, die man sich als kristallene Kugelschalen vorstellt, in der Reihenfolge: Mond Merkur Venus Sonne Mars Jupiter Saturn. Ganz außen dreht sich die »achte Sphäre«, die Fixsternsphäre, die in ihrer tägl. Bewegung alle inneren Sphären mitnimmt. Nach der Lehre der »Hypothesen« schließen die Planetensphären sich lückenlos aneinander an. Die »Hypothesen« sind nur arab. erhalten.

Dazu kommen bei Ptolemaios Annahmen über die Kreisbewegung der Planeten (→Planetenbewegung). Jeder Planet bewegt sich zw. der äußeren und der inneren Grenzfläche seiner Sphäre auf einem kleinen Kreis, einem Epizykel, dessen Mittelpunkt auf einem größeren, exzentrischen Kreis um die Erde herumläuft. Die Bewegung des Epizykelmittelpunktes auf dem Exzenter ist aber nicht gleichmäßig, sondern so, daß sie, von einem außerhalb des Mittelpunktes gelegenen »Ausgleichspunkt« (punctum equans) aus gesehen, gleichmäßig erscheint. Die Bewegungen des Mondes und des Planeten Merkur sind noch komplizierter. Auf Grund dieser Hypothesen kann man nach Ptolemaios die Planetenpositionen für jeden beliebigen Augenblick berechnen.

In der Zeit nach Ptolemaios diente die A. v.a. der →Astrologie. Die Werke des Ptolemaios, bes. der Almagest und die »Handlichen Tafeln«, wurden in Alexandria und Byzanz studiert, ergänzt und kommentiert. Erhalten sind die Kommentare zum Almagest von Pappos und von →Theon v. Alexandria sowie eine anonyme Einführung (Prolegomena) zum Almagest mit Beobachtungen von →Heliodoros aus den Jahren 498 und 509. Theon hat auch einen kleinen und einen großen Kommentar zu den Handlichen Tafeln geschrieben. Diese Tafeln wurden von den byz. Astrologen viel benutzt: die in ihnen enthaltene Königsliste wurde bis in die späbyz. Zeit fortgesetzt. Stephanos v. Alexandria, der unter dem Ks. Heraklios (610-641) nach Byzanz kam, schrieb einen Kommentar zu den Handlichen Tafeln (H. USENER, Kleine Schr. III, 294-317).

Book overview

One of the most important publications for many years in the fields of medical, religious and social history. Rawcliffe's book completely overhauls our understanding of leprosy and contributes immensely to our knowledge of the English middle ages. EHR Set firmly in the medical, religious and cultural milieu of the European Middle Ages, this book is the first serious, comprehensive study of a disease surrounded by misconceptions and prejudices. Even specialists will be surprised to learn that most of our stereotyped ideas about the segregation of medieval lepers originated in the nineteenth century; that leprosy excited a vast range of responses, from admiration to revulsion; that in the later Middle Ages it was diagnosed readily even by laity; that a wide range of treatment was available, that medieval leper hospitals were no more austere than the monasteries on which they were modelled; that the decline of leprosy was not monocausal but implied a complex web of factors - medical, environmental, social and legal. Written with consummate skill, subtlety and rigour, this book will change forever the image of the medieval leper. CAROLE RAWCLIFFE is Professor of Medieval History at the University of East Anglia.
